1.  buzzed to say that at lunch today there had been considerable discussion as to the necessity for helicopter service to the new building. Apparently, both General Cabell and Mr. Dulles were there and Walt wanted to tip me off about the conversation. I told him that we had done some thinking in this field but that we had not made any firm plan. I think that in view of General Cabell's interest in this we would be wise to go ahead and staff out the various possibilities for this service. (I should ask Logistics to do this at an early date.) H

2. Emmett Echols advised me that per the Director's instructions General Cabell would sign all farewell letters to personnel who were retiring in the future.

3.  telephoned to fill me in at some length on a flap growing out of contacts with the  without the knowledge of the EE Division in connection with the  investigation. Bob is going to brief Dick Bissell on the entire matter, which has been carried on in full coordination with the CI Staff, and will let me know if there is anything further that I can or should do.
